

CONTROL FOR LESS

Easier control, lower prices

Two offers on automation for roller shutters with SELVE motors

Enjoy convenient roller shutter control at special prices! Buy roller shutters with SELVE motors and get the Home Server 3 hub for €139. Order at least 8 roller shutters with radio-controlled motors and get the commeo Send remote control for €1. Both offers can be combined!

1 €

commeo Send 10 remote control

commeo Send when you buy at least 8 roller shutters with SELVE radio motors.

139 €

SELVE Home Server 3

Smart home hub with the purchase of motorised roller shutters.

The offer is valid for orders placed by 31 March 2027, for fulfilment by 30 April 2027. Filplast reserves the right to amend or withdraw the offer at any time without giving a reason. This will not affect the fulfilment of contracts entered into during the offer period.

SELVE HOME SERVER 3

The heart of your smart home

Imagine a home where roller shutters respond to the sun, lighting adapts to the time of day and heating follows your schedule.

SELVE Home Server 3 brings compatible shading, lighting, sensors and heating devices together in one smart system. Control them from your phone, create your own scenarios or let everyday tasks happen automatically.

One app

Control shading, lighting and heating from your phone.

Your home takes care of it

Create scenes and schedules for every part of the day.

Ready for more

Connect your roller shutters via Matter and control them by voice too.

Your home. One system.

SELVE Home Server 3

Roller shutters · Screen blinds · Lighting · Heating · Sensors

The features shown require compatible motors, receivers and additional devices.

A home that adapts to you

One hub. More everyday convenience.

Start the day your way

Your roller shutters open at the scheduled time, letting natural light in. No need to go from window to window.

Start with roller shutters. Expand whenever you like.

SELVE Home Server 3 works with the SELVE commeo and iveo/intronic radio systems, as well as selected Homematic IP devices.

Thanks to the Matter standard, you can also integrate the SELVE system into a compatible Apple Home, Google Home, Amazon Alexa or Samsung SmartThings ecosystem and make it work with devices from other manufacturers.

Comfort in any weather

With suitable sensors, shading can respond automatically to strong sunlight, helping to reduce heat build-up indoors.

Stay in control, even when you're out

Control compatible devices remotely with the SELVE Home 3 app. Check the available status information and adjust settings wherever you are.

One scenario, several actions

Select the 'Good night' scene to close the roller shutters and switch off selected lights. You can also schedule room temperatures for the night.
